SUBJECT INDEX

Air flow
Atmospheric Flow Indices and Interannual Great Salt Lake Variability, Young-Il Moon and Upmanu Lall, HE Apr. 96, p55-62.

Analysis
Analytical Solutions for Two-Dimensional Transport Equation with Time-Dependent Dispersion Coefficients, Mustafa M. Aral and Boshu Liao, HE Jan. 96, p20-32.

Aquifers
Hydrologic Theory of Dispersion in Heterogeneous Aquifers, Sergio E. Serrano, HE Oct. 96, p144-151.

Atmospheric diffusion
Atmospheric Flow Indices and Interannual Great Salt Lake Variability, Young-Il Moon and Upmanu Lall, HE Apr. 96, p55-62.

Catchments
Diffusion Wave Modeling of Distributed Catchment Dynamics, Stefano Orlandini and Renzo Rosso, HE July 96, p103-113.

Temporal Variation of Sediment Yield, U. C. Kothyari, A. K. Tiwari and Ranvir Singh, HE Oct. 96, p169-176.

Chemicals
Transforms for Runoff and Sediment Transport, Pierre Y. Julien, HE July 96, p114-122.

Climatic changes
Effect of Climate Change on Hydrologic Regime of Two Climatically Different Watersheds, Athanasios Loukas and Michael C. Quick, HE Apr. 96, p77-87.

Colloids
Dimensional Analysis of Colloid-Facilitated Ground-Water Contaminant Transport, M. Yavuz Corapcioglu and Shiyan Jiang, HE Oct. 96, p139-143.

Contaminants
Analytical Solutions for Two-Dimensional Transport Equation with Time-Dependent Dispersion Coefficients, Mustafa M. Aral and Boshu Liao, HE Jan. 96, p20-32.

Dimensional Analysis of Colloid-Facilitated Ground-Water Contaminant Transport, M. Yavuz Corapcioglu and Shiyan Jiang, HE Oct. 96, p139-143.

Contamination
Site Vulnerability Assessment for Wellhead Protection Planning, Wade E. Hathhorn and Tyler Wubbena, HE Oct. 96, p152-160.

Decomposition
Hydrologic Theory of Dispersion in Heterogeneous Aquifers, Sergio E. Serrano, HE Oct. 96, p144-151.

Depth
Rainfall Depth—Duration Relationship for South Italy, Vito Ferro and Vincenzo Bagarello, HE Oct. 96, p178-180.

Differential equations
Characteristics in Evaluating Stream Functions in Ground-Water Flow, G. B. Matanga, HE Jan. 96, p49-53.

Diffusion
Analytical Solutions for Two-Dimensional Transport Equation with Time-Dependent Dispersion Coefficients, Mustafa M. Aral and Boshu Liao, HE Jan. 96, p20-32.

Dimensional analysis
Dimensional Analysis of Colloid-Facilitated Ground-Water Contaminant Transport, M. Yavuz Corapcioglu and Shiyan Jiang, HE Oct. 96, p139-143.

Dispersion
Analytical Solutions for Two-Dimensional Transport Equation with Time-Dependent Dispersion Coefficients, Mustafa M. Aral and Boshu Liao, HE Jan. 96, p20-32.

Hydrologic Theory of Dispersion in Heterogeneous Aquifers, Sergio E. Serrano, HE Oct. 96, p144-151.

Distribution functions
Transforms for Runoff and Sediment Transport, Pierre Y. Julien, HE July 96, p114-122.

Droughts
Probability Distribution of Annual Maximum, Mean, and Minimum Streamflows in the United States, Richard M. Vogel and Ian Wilson, HE Apr. 96, p69-76.

Dynamics
Diffusion Wave Modeling of Distributed Catchment Dynamics, Stefano Orlandini and Renzo Rosso, HE July 96, p103-113.

Effluents
Cumulants-Based Analysis of Concentration Data from Soil-Column Studies for System Identification, Rao S. Govindaraju, Bhabani S. Das and Gerard J. Kluitenberg, HE Jan. 96, p41-48.

Estimation
Probability-Weighted Moments without Plotting Position Formula, Tefaruk Haktanir, HE Apr. 96, p89-91.

Flood frequency
Detection of Outliers in Pearson Type III Data, Colleen S. Spencer and Richard H. McCuen, HE Jan. 96, p2-10.

Floodplain Mapping Using Continuous Hydrologic and Hydraulic Simulation Models, A. Allen Bradley, Paula J. Cooper, Kenneth W. Potter and Thomas Price, HE Apr. 96, p63-68.

Probability Distribution of Annual Maximum, Mean, and Minimum Streamflows in the United States, Richard M. Vogel and Ian Wilson, HE Apr. 96, p69-76.

Probability-Weighted Moments without Plotting Position Formula, Tefaruk Haktanir, HE Apr. 96, p89-91.

Flood hydrology
Runoff Curve Number: Has It Reached Maturity? Victor M. Ponce and Richard H. Hawkins, HE Jan. 96, p11-19.

Flood peaks
Floodplain Mapping Using Continuous Hydrologic and Hydraulic Simulation Models, A. Allen Bradley, Paula J. Cooper, Kenneth W. Potter and Thomas Price, HE Apr. 96, p63-68.

Flood plain studies
Floodplain Mapping Using Continuous Hydrologic and Hydraulic Simulation Models, A. Allen Bradley, Paula J. Cooper, Kenneth W. Potter and Thomas Price, HE Apr. 96, p63-68.

Floods
Probability Distribution of Annual Maximum, Mean, and Minimum Streamflows in the United States, Richard M. Vogel and Ian Wilson, HE Apr. 96, p69-76.

Forecasting
Using NOAA's New Climate Outlooks in Operational Hydrology, Thomas E. Croley, II, HE July 96, p93-102.

Frequency analysis
Probability Distribution of Annual Maximum, Mean, and Minimum Streamflows in the United States, Richard M. Vogel and Ian Wilson, HE Apr. 96, p69-76.

Probability-Weighted Moments withcut Plotting Position Formula, Tefaruk Haktanir, HE Apr. 96, p89-91.

Geography
Rainfall Depth—Duration Relationship for South Italy, Vito Ferro and Vincenzo Bagarello, HE Oct. 96, p178-180.

Great Salt Lake
Atmospheric Flow Indices and Interannual Great Salt Lake Variability, Young-Il Moon and Upmanu Lall, HE Apr. 96, p55-62.

Ground water
Characteristics in Evaluating Stream Functions in Ground-Water Flow, G. B. Matanga, HE Jan. 96, p49-53.

Dimensional Analysis of Colloid-Facilitated Ground-Water Contaminant Transport, M. Yavuz Corapcioglu and Shiyan Jiang, HE Oct. 96, p139-143.

Ground-water flow
Characteristics in Evaluating Stream Functions in Ground-Water Flow, G. B. Matanga, HE Jan. 96, p49-53.

Ground-water pollution
Hydrologic Theory of Dispersion in Heterogeneous Aquifers, Sergio E. Serrano, HE Oct. 96, p144-151.

Ground-water quality
Site Vulnerability Assessment for Wellhead Protection Planning, Wade E. Hathhorn and Tyler Wubbena, HE Oct. 96, p152-160.

Guidelines
Detection of Outliers in Pearson Type III Data, Colleen S. Spencer and Richard H. McCuen, HE Jan. 96, p2-10.

Homogeneity
Upscaled Soil-Water Retention Using van Genuchten's Function, Timothy R. Green, James E. Constantz and David L. Freyberg, HE July 96, p123-130.

Hydraulic properties
Comparison of Spatial Variability of Infiltration Properties at Two Sites in Konza Prairie of East-Central Kansas, R. S. Govindaraju, J. K. Koelliker, M. K. Banks and A. P. Schwab, HE July 96, p131-138.

Hydrologic models
Effect of Climate Change on Hydrologic Regime of Two Climatically Different Watersheds, Athanasios Loukas and Michael C. Quick, HE Apr. 96, p77-87.

Floodplain Mapping Using Continuous Hydrologic and Hydraulic Simulation Models, A. Allen Bradley, Paula J. Cooper, Kenneth W. Potter and Thomas Price, HE Apr. 96, p63-68.

Hydrology
Editorial, M. L. Kawas, HE Jan. 96, p1.

Hydrologic Theory of Dispersion in Heterogeneous Aquifers, Sergio E. Serrano, HE Oct. 96, p144-151.

Rainfall Depth—Duration Relationship for South Italy, Vito Ferro and Vincenzo Bagarello, HE Oct. 96, p178-180.

Runoff Curve Number: Has It Reached Maturity? Victor M. Ponce and Richard H. Hawkins, HE Jan. 96, p11-19.

Using NOAA's New Climate Outlooks in Operational Hydrology, Thomas E. Croley, II, HE July 96, p93-102.

Hydrometeorology
Editorial, M. L. Kawas, HE Jan. 96, p1.

Identification
Cumulants-Based Analysis of Concentration Data from Soil-Column Studies for System Identification, Rao S. Govindaraju, Bhabani S. Das and Gerard J. Kluitenberg, HE Jan. 96, p41-48.

Infiltration
Comparison of Spatial Variability of Infiltration Properties at Two Sites in Konza Prairie of East-Central Kansas, R. S. Govindaraju, J. K. Koelliker, M. K. Banks and A. P. Schwab, HE July 96, p131-138.

Least squares method
Rainfall Depth—Duration Relationship for South Italy, Vito Ferro and Vincenzo Bagarello, HE Oct. 96, p178-180.

Markov process
Nonhomogeneous Markov Model for Daily Precipitation, Balaji Rajagopalan, Upmanu Lall and David G. Tarboton, HE Jan. 96, p33-40.

Meteorology
Using NOAA's New Climate Outlooks in Operational Hydrology, Thomas E. Croley, II, HE July 96, p93-102.

Modeling
Runoff Curve Number: Has It Reached Maturity? Victor M. Ponce and Richard H. Hawkins, HE Jan. 96, p11-19.

Upscaled Soil-Water Retention Using van Genuchten's Function, Timothy R. Green, James E. Constantz and David L. Freyberg, HE July 96, p123-130.

Models
Diffusion Wave Modeling of Distributed Catchment Dynamics, Stefano Orlandini and Renzo Rosso, HE July 96, p103-113.

Moments
Cumulants-Based Analysis of Concentration Data from Soil-Column Studies for System Identification, Rao S. Govindaraju, Bhabani S. Das and Gerard J. Kluitenberg, HE Jan. 96, p41-48.

Monte Carlo method
Detection of Outliers in Pearson Type III Data, Colleen S. Spencer and Richard H. McCuen, HE Jan. 96, p2-10.

Parameters
Probability-Weighted Moments without Plotting Position Formula, Tefaruk Haktanir, HE Apr. 96, p89-91.

Particles
Stochastic Analysis for Movement of Fine Particles in Porous Media, Rao S. Govindaraju, HE Oct. 96, p161-168.

Porous media
Stochastic Analysis for Movement of Fine Particles in Porous Media, Rao S. Govindaraju, HE Oct. 96, p161-168.

Precipitation
Nonhomogeneous Markov Model for Daily Precipitation, Balaji Rajagopalan, Upmanu Lall and David G. Tarboton, HE Jan. 96, p33-40.

Probabilistic models
Nonhomogeneous Markov Model for Daily Precipitation, Balaji Rajagopalan, Upmanu Lall and David G. Tarboton, HE Jan. 96, p33-40.

Probability
Using NOAA's New Climate Outlooks in Operational Hydrology, Thomas E. Croley, II, HE July 96, p93-102.

Probability distribution
Probability Distribution of Annual Maximum, Mean, and Minimum Streamflows in the United States, Richard M. Vogel and Ian Wilson, HE Apr. 96, p69-76.

Probability-Weighted Moments without Plotting Position Formula, Tefaruk Haktanir, HE Apr. 96, p89-91.

Rainfall duration
Nonhomogeneous Markov Model for Daily Precipitation, Balaji Rajagopalan, Upmanu Lall and David G. Tarboton, HE Jan. 96, p33-40.

Rainfall Depth—Duration Relationship for South Italy, Vito Ferro and Vincenzo Bagarello, HE Oct. 96, p178-180.

Regional analysis
Rainfall Depth—Duration Relationship for South Italy, Vito Ferro and Vincenzo Bagarello, HE Oct. 96, p178-180.

Reservoir sedimentation
Temporal Variation of Sediment Yield, U. C. Kothyari, A. K. Tiwari and Ranvir Singh, HE Oct. 96, p169-176.

Retention
Upscaled Soil-Water Retention Using van Genuchten's Function, Timothy R. Green, James E. Constantz and David L. Freyberg, HE July 96, p123-130.

Risk analysis
Site Vulnerability Assessment for Wellhead Protection Planning, Wade E. Hathhorn and Tyler Wubbena, HE Oct. 96, p152-160.

Runoff
Effect of Climate Change on Hydrologic Regime of Two Climatically Different Watersheds, Athanasios Loukas and Michael C. Quick, HE Apr. 96, p77-87.

Floodplain Mapping Using Continuous Hydrologic and Hydraulic Simulation Models, A. Allen Bradley, Paula J. Cooper, Kenneth W. Potter and Thomas Price, HE Apr. 96, p63-68.

Runoff Curve Number: Has It Reached Maturity? Victor M. Ponce and Richard H. Hawkins, HE Jan. 96, p11-19.

Sediment concentration
Transforms for Runoff and Sediment Transport, Pierre Y. Julien, HE July 96, p114-122.

Sediment transport
Transforms for Runoff and Sediment Transport, Pierre Y. Julien, HE July 96, p114-122.

Sediment yield
Temporal Variation of Sediment Yield, U. C. Kothyari, A. K. Tiwari and Ranvir Singh, HE Oct. 96, p169-176.

Skewness
Detection of Outliers in Pearson Type III Data, Colleen S. Spencer and Richard H. McCuen, HE Jan. 96, p2-10.

Soil water
Upscaled Soil-Water Retention Using van Genuchten's Function, Timothy R. Green, James E. Constantz and David L. Freyberg, HE July 96, p123-130.

Soils
Comparison of Spatial Variability of Infiltration Properties at Two Sites in Konza Prairie of East-Central Kansas, R. S. Govindaraju, J. K. Koelliker, M. K. Banks and A. P. Schwab, HE July 96, p131-138.

Solutes
Cumulants-Based Analysis of Concentration Data from Soil-Column Studies for System Identification, Rao S. Govindaraju, Bhabani S. Das and Gerard J. Kluitenberg, HE Jan. 96, p41-48.

Spatial analysis
Comparison of Spatial Variability of Infiltration Properties at Two Sites in Konza Prairie of East-Central Kansas, R. S. Govindaraju, J. K. Koelliker, M. K. Banks and A. P. Schwab, HE July 96, p131-138.

Spectral analysis
Atmospheric Flow Indices and Interannual Great Salt Lake Variability, Young-Il Moon and Upmanu Lall, HE Apr. 96, p55-62.

Statistical analysis
Detection of Outliers in Pearson Type III Data, Colleen S. Spencer and Richard H. McCuen, HE Jan. 96, p2-10.

Floodplain Mapping Using Continuous Hydrologic and Hydraulic Simulation Models, A. Allen Bradley, Paula J. Cooper, Kenneth W. Potter and Thomas Price, HE Apr. 96, p63-68.

Stochastic processes
Stochastic Analysis for Movement of Fine Particles in Porous Media, Rao S. Govindaraju, HE Oct. 96, p161-168.

Stormwater
Diffusion Wave Modeling of Distributed Catchment Dynamics, Stefano Orlandini and Renzo Rosso, HE July 96, p103-113.

Stream function
Characteristics in Evaluating Stream Functions in Ground-Water Flow, G. B. Matanga, HE Jan. 96, p49-53.

Streamflow
Probability Distribution of Annual Maximum, Mean, and Minimum Streamflows in the United States, Richard M. Vogel and Ian Wilson, HE Apr. 96, p69-76.

Surface runoff
Diffusion Wave Modeling of Distributed Catchment Dynamics, Stefano Orlandini and Renzo Rosso, HE July 96, p103-113.

Runoff Curve Number: Has It Reached Maturity? Victor M. Ponce and Richard H. Hawkins, HE Jan. 96, p11-19.

Transforms for Runoff and Sediment Transport, Pierre Y. Julien, HE July 96, p114-122.

Systems
Cumulants-Based Analysis of Concentration Data from Soil-Column Studies for System Identification, Rao S. Govindaraju, Bhabani S. Das and Gerard J. Kluitenberg, HE Jan. 96, p41-48.

Three-dimensional flow
Characteristics in Evaluating Stream Functions in Ground-Water Flow, G. B. Matanga, HE Jan. 96, p49-53.

Time dependence
Analytical Solutions for Two-Dimensional Transport Equation with Time-Dependent Dispersion Coefficients, Mustafa M. Aral and Boshu Liao, HE Jan. 96, p20-32.

Time factors
Temporal Variation of Sediment Yield, U. C. Kothyari, A. K. Tiwari and Ranvir Singh, HE Oct. 96, p169-176.

Time series analysis
Atmospheric Flow Indices and Interannual Great Salt Lake Variability, Young-Il Moon and Upmanu Lall, HE Apr. 96, p55-62.

Transformations
Transforms for Runoff and Sediment Transport, Pierre Y. Julien, HE July 96, p114-122.

Transport phenomena
Analytical Solutions for Two-Dimensional Transport Equation with Time-Dependent Dispersion Coefficients, Mustafa M. Aral and Boshu Liao, HE Jan. 96, p20-32.

Cumulants-Based Analysis of Concentration Data from Soil-Column Studies for System Identification, Rao S. Govindaraju, Bhabani S. Das and Gerard J. Kluitenberg, HE Jan. 96, p41-48.

Dimensional Analysis of Colloid-Facilitated Ground-Water Contaminant Transport, M. Yavuz Corapcioglu and Shiyan Jiang, HE Oct. 96, p139-143.

Stochastic Analysis for Movement of Fine Particles in Porous Media, Rao S. Govindaraju, HE Oct. 96, p161-168.

Urban areas
Floodplain Mapping Using Continuous Hydrologic and Hydraulic Simulation Models, A. Allen Bradley, Paula J. Cooper, Kenneth W. Potter and Thomas Price, HE Apr. 96, p63-68.

Vadose zone
Editorial, M. L. Kawas, HE Jan. 96, p1.

Variability
Comparison of Spatial Variability of Infiltration Properties at Two Sites in Konza Prairie of East-Central Kansas, R. S. Govindaraju, J. K. Koelliker, M. K. Banks and A. P. Schwab, HE July 96, p131-138.

Volume change
Atmospheric Flow Indices and Interannual Great Salt Lake Variability, Young-Il Moon and Upmanu Lall, HE Apr. 96, p55-62.

Water content
Upscaled Soil-Water Retention Using van Genuchten's Function, Timothy R. Green, James E. Constantz and David L. Freyberg, HE July 96, p123-130.

Water resources
Using NOAA's New Climate Outlooks in Operational Hydrology, Thomas E. Croley, II, HE July 96, p93-102.

Water resources management
Site Vulnerability Assessment for Wellhead Protection Planning, Wade E. Hathhorn and Tyler Wubbena, HE Oct. 96, p152-160.

Watershed management
Editorial, M. L. Kawas, HE Jan. 96, p1.

Effect of Climate Change on Hydrologic Regime of Two Climatically Different Watersheds, Athanasios Loukas and Michael C. Quick, HE Apr. 96, p77-87.

Watersheds
Effect of Climate Change on Hydrologic Regime of Two Climatically Different Watersheds, Athanasios Loukas and Michael C. Quick, HE Apr. 96, p77-87.

Rainfall Depth—Duration Relationship for South Italy, Vito Ferro and Vincenzo Bagarello, HE Oct. 96, p178-180.

Wells
Site Vulnerability Assessment for Wellhead Protection Planning, Wade E. Hathhorn and Tyler Wubbena, HE Oct. 96, p152-160.

AUTHOR INDEX

Aral, Mustafa M.
Analytical Solutions for Two-Dimensional Transport Equation with Time-Dependent Dispersion Coefficients, with Boshu Liao, HE Jan. 96, p20-32
